

SHUBHAM REDDY

Applied AI & Automation Engineer | Application Support (L2)

Pune, India | +91-9172587538 | shubhamreddy9172@gmail.com

[LinkedIn](#) · [GitHub](#) · [Portfolio](#)

SUMMARY

AI Engineer with 2 years of production experience at TCS. Built an enterprise AI agent for auto-generating incident comments and a RAG-based onboarding system that reduced time-to-productivity by 85%. Expert in LLM integration, prompt engineering (LangChain, Gemini, NVIDIA NIM), and building production-grade AI systems.

TECHNICAL SKILLS

LLM & AI: LangChain, Gemini API, NVIDIA NIM, RAG, ChromaDB, Chain-of-Thought, Prompt Engineering, AI Agents

Frontend & Backend: Next.js, React, TypeScript, Tailwind CSS, FastAPI, Python, SQL, Docker

DevOps & Cloud: GCP (Monitoring), Jenkins, Concourse CI/CD, LLM Evaluation

EXPERIENCE

System Engineer

May 2024 – Present

Tata Consultancy Services (TCS) – Pune

- Managed 20+ monthly production data updates via REST APIs (Postman), ensuring 100% data integrity.
- Wrote optimized SQL queries (PostgreSQL) for incident analysis and weekly health reporting.
- Maintained Jenkins/Concourse CI/CD pipelines, ensuring zero-downtime for enterprise applications.
- Owned daily health reporting: PostgreSQL status, GCP data pipelines, and monitoring system validation.

PROJECTS

Digital Control Room (AI Portfolio) | github.com/shubhamr9172/sr-portfolio

- Built an **L2 Diagnostic Terminal** using Nemotron-120B for log analysis and SOP generation.
- Engineered an **Adaptive Interface** enforcing STAR-method constraints via dynamic prompts.
- Designed a responsive **3D Neural Topography** hero section using Canvas API and Framer Motion.

Corporate Onboarding Assistant (AI-RAG) | github.com/shubhamr9172/COA

- Engineered a RAG system reducing employee onboarding from 1 week to 1 day (85% reduction).
- Developed a role-aware personalization engine to filter knowledge retrieval based on user profile.
- Built a document ingestion engine using ChromaDB for high-accuracy semantic search.

Enterprise Incident AI Agent | *Microsoft Copilot Studio — TCS*

- Deployed a conversational AI on MS Teams for daily incident analysis and closure comment generation.
- Reduced manual documentation time by ~60% while enforcing ITIL-compliant output structures.

Zenith-LaTeX | github.com/shubhamr9172/Zenith-LaTeX

- Architected a serverless React app transforming LaTeX to ATS-compliant PDFs using Gemini API.
- Engineered custom model lifecycle management to ensure 100% stability in Monaco Editor.

EDUCATION & CERTIFICATIONS

B.E. Computer Science — MMIT, Pune (2023)

Diploma IT — PLGP, Latur (2020)

Certifications: MS Applied Skill: Microsoft Copilot Studio (2026) | Google GenAI | Intel AI Aware

ADDITIONAL

Authored technical blogs on AI and Automation; created educational content on GenAI and Prompt Engineering.
